SUMMARY OF PAST AND CURRENT WORK

For almost 10 years, Enzo Messina has been working in the Bioinformatics division of Marine Molecular Microbiology and Biotechnology group inside the IAMC (now IRBIM) CNR of Messina, developing Unix pipelines for genomic and metagenomic analysis of numerous samples, assembling over a dozen of Halobacteria genomes, with relative gene annotation and submission on NCBI genome database. He has excellent computer skills, thirty years of experience on installation, configuration and optimization of the principal operating systems (Windows, Macintosh, Linux/Unix) and programming languages. **As for end of Oct, 2021 his Hirsh Index is 14, his i10-index 17, with more than 700 citations.**
